Sintratec Kit: most innovative product on the Polish market

The *Sintratec Kit* has been named the most innovative product launched onto the Polish market in 2018. Sintratec's new distributor BIBUS MENOS has received the prize in the context of the "3D Printing Days", which are currently taking place in Kielce, Poland.

Brugg, 12 April 2018 – Sintratec's new Polish distribution partner BIBUS MENOS receives a prize for launching the most innovative product on the Polish market in 2018 with the *Sintratec Kit*. The prize is awarded annually by the Association for Innovative Technologies Poland, which also organizes the "3D Printing Days" in Kielce.

"We are delighted that BIBUS MENOS has won this award for the launch of our product. Making SLS technology with innovative engineering accessible to a broad audience worldwide has always been our declared goal. The fact that our product is regarded as the most innovative product in the Polish market, which has been developing dynamically for many years in terms of technology, particularly honors us," says Gabor Koppanyi, Head of Marketing and Sales at Sintratec.

Tomasz Weis, team leader at BIBUS MENOS adds: "We are very happy that we got this award. This shows that this desktop SLS system is a very interesting product on our market."

The young Swiss company Sintratec is a pioneer in the development of compact SLS 3D printers. The *Sintratec Kit* is the first and only SLS system in kit format. The ease of use and the open parameters combined with the affordable price make the *Sintratec Kit* the perfect entry-level machine into the world of Selective Laser Sintering (SLS).

About Sintratec

Sintratec is Switzerland's leading 3D printer manufacturer and specialized in the development and production of SLS 3D printers. The range includes compact laser sintering systems which process high quality polymers. Sintratec's laser sintering technology allows the production of complex and freeform objects which meet demanding part resolution, robustness and temperature standards. Many hundreds of professional Sintratec machines are in operation around the world in various industries, universities and research institutes.
