

Press Release

Sintratec continuing to expand its presence in Germany

Thanks to the new cooperation with das Dokuteam NordWest GmbH, Sintratec is directly connected to the powerful market of Nordrhein-Westfalen and adjoining regions. With the two existing resellers in Baden-Württemberg and Bayern, Sintratec's partner network is covering the whole German market now.

Brugg (Switzerland), 24.th of January 2019 – The 3D printing systems of Sintratec now are also distributed in northern Germany by the company das Dokuteam **NordWest GmbH** based in Nottuln near Münster. By that, the leading Swiss developer and manufacturer of selective laser sintering systems (SLS) continues to expand its presence in Germany. Besides the desktop models Sintratec Kit and Sintratec S1, Dokuteam will introduce the new end-to-end solution Sintratec S2 as well as resell the Sintratec PA12 und Sintratec TPE materials. Professional technical support completes the services of the German experts.

Dokuteam is a full-service industry partner with a broad experience in professional additive manufacturing ranging from rapid prototyping through tooling up until production. In its 30-year-history the company has established a big system and service network. Knowing the northern German market profoundly, Dokuteam has continuously adapted itself to new challenges. It has elaborated its competence with great performance readiness.

Ralf Felmet, CEO of das Dokuteam NordWest GmbH, says: «The Sintratec S2 is one of the most innovative products in additive manufacturing. The compact end-to-end solution compels in many ways, particularly by its divided printer unit and material unit. This makes the Sintratec S2 a highly flexible system suitable for both modern product development as well as – thanks to its scalable design – the production of small series. »

All kind of services and professional training

Besides consulting, machine leasing and rental services or job order production, Dokuteam is conducting also workshops and seminars about 3D printing not only in the SLS field (selective laser sintering), but also about FDM (fused deposition modeling) – also known as fused filament fabrication (FFF) – and SLA (stereolithography). The German additive manufacturing experts meet the need of every customer and provide them with the perfect fitting 3D printing system. Dominik Solenicki, CEO of Sintratec: « Thanks to Dokuteam joining our reseller network we are able to support our customers in northern Germany with a sustainably working team of 3D printing professionals. »

Apart from Dokuteam, the Sintratec systems are distributed in Germany through Mann Datentechnik in Karlsruhe and Picco´s 3D World GmbH in Deggendorf, which is situated near the Czech border.

About Sintratec

Sintratec is the leading Swiss developer and manufacturer of precise 3D printers for professional use. The cost-effective and compact systems employ the selective laser sintering (SLS) technology in order to process high-quality polymer and elastomer materials. By means of the Sintratec-Technology, users can create complex objects with an exceptionally high degree in freedom of form. Whether stiff or flexible, Sintratec materials are highly resilient and temperature-resistant. Sintratec systems are worldwide in operation in various industries, research institutes and universities. Founded in 2014 as a start-up, Sintratec managed to transform itself into an innovation-strong technology company.
