

[Sintratec expands its distribution network](#)

## Sintratec goes to Dubai

Sintratec is now represented on the Arabian Peninsula with its new distribution partner for the United Arab Emirates, Saudi Arabia and Jordan. Based in Dubai and Riyadh, Maptec Computer Systems is now shipping all Sintratec products to this Middle East Region.

Brugg (Switzerland), the 5<sup>th</sup> of April 2019

Dubai is known for superlatives in architecture and aviation. But in this Arab business hub more and more industries that are not directly related to the oil and gas production gain in importance. The boom in the construction sector, the growing manufacturing industry and the flourishing trade and services sector are diversifying the economy in the United Arab Emirates. Thus, the classical manufacturing industry, medical technology, the packaging industry as well as the education and art sector are interested in state-of-the-art technologies such as 3D printing.

### [Focus on fast 3D technology](#)

Maptec focuses on solutions for rapid prototyping and component manufacturing. Stationed in the midst of the dynamic metropolis, Sintratec's partner combines more than 15 years of

manufacturing, 3D modeling, 3D visualization and rapid prototyping know-how. In addition to 3D printers for industrial and medical applications, the company also sells 3D scanners. Maptec supports its customers from consulting and commissioning to technical training. Jafar Odeh, Managing Director at Maptec: "The Sintratec S2 is the only professional and economical SLS solution in the market that can grow with the user's demand thanks to its scalability." Gabor Koppanyi, Head of Marketing and Sales at Sintratec, adds: «There is a huge potential in the Arabian Peninsula for a young, technology-savvy generation that is interested in modern technologies. We are pleased and proud that our products are in high demand in this fast-moving region. With Maptec, we now have an experienced partner who passionately supports our customers. The World Expo 2020 in Dubai will provide a highly interesting framework for Sintratec and Maptec.»

# Sintratec

Sintratec is the leading Swiss developer and manufacturer of precise 3D printers for professional use. The affordable and compact systems employ the selective laser sintering (SLS) technology in order to process high-quality polymer materials. By means of the Sintratec-Technology, users can create complex objects with an exceptionally high degree in freedom of form. Whether stiff or flexible, Sintratec materials are highly resilient and temperature-resistant.

Sintratec systems are in operation worldwide in various industries, research institutes and universities. Founded in 2014 as a start-up, Sintratec managed to grow into a leading company.
