

Brugg (Switzerland), the 8th of December 2021

Bringing compact SLS systems to France

Through a new partnership with French 3D printing specialist KREOS, Swiss SLS manufacturer Sintratec is expanding its sales network in Western Europe. As a result, KREOS becomes the first distributor for the Sintratec S2 system in France.

Founded in 2007, KREOS is specialized in 3D printing and rapid prototyping systems. With 15 years of expertise in 3D products, KREOS has developed business solutions adapted for Jewelry, Dental, Orthodontics, Hearing aids, Aeronautics, and other industries. Thanks to their wide product range of renowned brands such as HP or Desktop Metal, the French company is able to offer additive solutions that meet the most demanding needs.

Through the partnership with Sintratec, the portfolio of KREOS is now complemented by the compact and expandable Sintratec S2 system. As the first distributor in France, KREOS already successfully introduced the SLS flagship at the 3D Print Paris trade show at the end of October 2021.

Ideal timing, since the recently launched Sintratec Nesting Solution increases efficiency of the S2 by up to 40%, further improving the system's industrial production capabilities. For Sintratec, this new partnership marks an important expansion of its distribution network as well as a new presence in the promising French market.

Gabor Koppanyi, Head of Marketing & Sales Sintratec

"We are delighted to have found an experienced and professional partner with KREOS for the French market. With their extensive experience in 3D production equipment and their range of industrial 3D printers, this is the ideal partnership for all of us and a big step for our local customers."

Denis Hamant, Founder and Co-Manager KREOS

"The arrival on the market of new technologies and new affordable SLS printing solutions prompted us to find a reliable and professional partner. We have found at Sintratec a proven and efficient technology to allow us to offer our customers a new offer in plastic 3D printing. We are very happy with this partnership and the possibilities it offers us."

Sintratec is the leading Swiss developer and manufacturer of precise 3D printers for professional use. The cost-effective and compact systems employ the selective laser sintering (SLS) technology in order to process high-quality polymer materials. By means of the Sintratec Technology, users can create complex objects with an exceptionally high freedom of design. Whether stiff or flexible, Sintratec materials are highly resilient and temperature-resistant.

Sintratec systems are in operation worldwide in various industries, research institutes and universities. Founded in 2014, Sintratec managed to grow into a leading technology company.
