

Brugg (Switzerland), the 16th of May 2022

Sintratec increases presence in Germany with Solidpro

Sintratec is entering into a new partnership with German provider of additive manufacturing solutions Solidpro. Thereby, the Swiss supplier of professional laser sintering systems is significantly expanding its distribution network in Central Europe.

Strong partners for strong solutions - Solidpro, a Bechtle company, supports the entire **3D value chain** of its customers: from the development to the production and manufacturing. For more than 25 years, the highly qualified and certified employees have been providing **customized and industry-specific solutions** at 11 locations throughout Germany.

In addition to its wide range of software, Solidpro already distributes additive manufacturing solutions of **HP and Markforged**. For the additive manufacturing post process, Solidpro relies on solutions by DyeMansion. Now the portfolio is expanded by the scalable **Sintratec S2 system**.

For Sintratec, the cooperation with Solidpro marks a significant **expansion** of the existing German distribution network. In May, the products of the Swiss company will already be represented by Solidpro (booth no. 2-317) at the **Rapid.Tech 3D** exhibition in Erfurt. Sintratec is delighted about the strengthened presence on the German market.

August Kurz, Manufacturing Sales Director Solidpro

«We have critically examined the market for a cost-effective compact system for the powder-bed process. With Sintratec as our partner, we have gained a perfect addition to our product portfolio. We were especially convinced by the modular and scalable system design.»

Gabor Koppanyi, Head of Marketing & Sales Sintratec

«In Solidpro we have found a very experienced and well-established partner. Adding the range of their 3D printing products and services with Sintratec is the ideal entry into SLS technology. We at Sintratec are very excited about this partnership – but most importantly, our local customers in Germany will benefit greatly.»

Sintratec is the leading Swiss developer and manufacturer of precise 3D printers for professional use. The cost-effective and compact systems employ the selective laser sintering (SLS) technology in order to process high-quality polymer materials. By means of the Sintratec Technology, users can create complex objects with an exceptionally high freedom of design. Whether stiff or flexible, Sintratec materials are highly resilient and temperature-resistant.

Sintratec systems are in operation worldwide in various industries, research institutes and universities. Founded in 2014, Sintratec managed to grow into a leading technology company.

Solidpro Informationssysteme GmbH

Since 1997, Solidpro, based in Langenau, Baden-Württemberg, Germany, has been supporting its customers' entire value chain, from development to visualization and production. From the industry-specific software solutions SOLIDWORKS, SolidCAM and CAMWorks to special workstations for users and professional 3D printing from HP Inc. and Sintratec AG, as well as customized services and seminars, Solidpro, with a total of 11 locations throughout Germany, does everything it can to achieve added value for customers and partners. As a successful medium-sized company, Solidpro benefits on the one hand from the flexibility, while on the other hand, as a member of the Bechtle Group, it is backed by a strong group of companies.
